MARINE AUDIO / VIDEO 2014-2015

MAKE YOUR MUSIC SEAWORTHY

Engineered to withstand water and salt

Water is a marine source unit's worst enemy and salt can be a nightmare. Our M704/CMV1/CMD8 source units have been IPX5 tested and certified to offer the highest water intrusion protection and salt resistance. Rubber gaskets stop water in its tracks, with integrated drainage channels to keep water out.

M704

**WATERTIGHT J1939 MARINE USB/
BLUETOOTH RECEIVER**

Dual-zone source and volume control

With this function, it is possible to split your boat into two discrete zones to enjoy different sources of entertainment. For instance, the fore can be tuned-in to a radio station while the stern can be dancing to tunes from a smart device. Volume levels can be individually controlled, so you can have a party going at full blast while keeping an ear on weather information up front.

Dual USB Rear Connectors

Equipped with two USB pigtails on the rear, it's easy to connect a variety of sources. In addition to using a smartphone you can also play music files stored on a USB memory device or portable audio player. The ability to keep two devices connected at the same time means there's no need to disconnect and reconnect each time you want to change your external source.

Bluetooth for Hands-Free Communication and Stereo Audio Streaming

Built-in Bluetooth provides hands-free voice communication, compatible with a wide variety of mobile phones. Play music stored on any Bluetooth device, whether it's a mobile phone or a portable audio player, with wireless convenience.

Smartphone Connectivity For Seamless Enjoyment Of Your Favorite Music

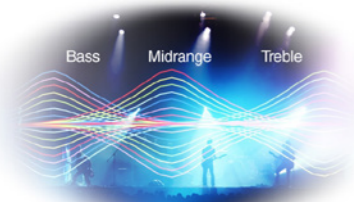

If you're the owner of a smartphone, you'll be happy to know that the music stored on it can be enjoyed on your boat's audio system, just like you would on land.

More information about M704

ENGINEERED FOR THE MARINE ENVIRONMENT

Sound Technology

Clarion's unique sound enhancement technologies are ready to perform. Beat EQ optimizes the sound field according to the type of music being played, using a 3-band parametric equalizer. Our decades of experience in in-car sound translates into a superior sound experience for you.

M109

MARINE CD RECEIVER

Optional
RCB176

Front AUX Input for Convenient Connection

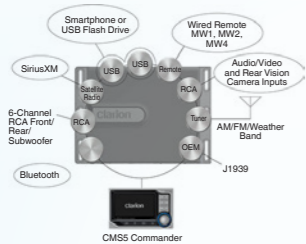

With AUX input connectors right on the front of the unit, it's extremely easy to hook up an external audio source for enjoyment through your boat's audio system.

M303 and M109:
1-DIN size full DCP receivers

Easy to install even in small spaces, safety is guaranteed thanks a fully detachable control panel. Ideal when the boat has to be left in non-secure areas or if it is not in use for long periods.

COMPACT SEPARATE SYSTEM WITH WATERTIGHT RUGGEDNESS PLUS SMARTPHONE CONNECTIVITY

Superior Expandability To Create Your Ideal System

The CMS5 was designed to offer maximum weather protection combined with maximum enjoyment of today's audio sources. It's made to connect with Bluetooth compatible devices, Dual 2.1A USB Ports, smartphone interface, AUX Input RCA's, and more. Attach what you like and create a custom system; whatever music sources you enjoy.

CMS5

DIGITAL MEDIA MARINE RECEIVER WITH 4.3-INCH COLOUR LCD WATERTIGHT CONTROLLER WITH J1939 COMPATIBILITY

Clarion's CMS5 is a source unit and a media hub, all rolled into one "black box". The essentials, including AM/FM/weather band radio, are built in, and with a wide variety of connections, including USB, you can easily build a system that can be customised to your exact needs.

- J1939 CAN Bus compatibility allows for control via your boat's multi-function display • 4.3" optically bonded colour LCD

display holder sold separately

CMS2

DIGITAL MEDIA RECEIVER WITH WATERTIGHT COMMANDER

- Multi-angle adjustable
- Global AM/FM/weather band

Just connect your smartphone using the 1.1 Amp USB pigtail for music playback from the CMS2.

Smartphone Connectivity For Seamless Enjoyment Of Your Favorite Music

If you're the owner of a smartphone, you'll be happy to know that the music stored on it can be enjoyed on your boat's audio system, just like you would on land.

MARINE AMPLIFIERS

Corrosion resistant RCA and block terminals on all XC series* amplifiers

By utilising corrosion resistant RCA and block terminals, XC series amplifiers offer improved durability and reliability in harsh environments. The XC series amplifiers are true marine amplifiers with oversized aluminium heatsinks and locking power terminals for harsh marine conditions.

MOS-FET power amp

There's only one way for Clarion's source units to deliver unyielding power output and linearity: MOS-FET amplification, or Metal Oxide Semiconductor Field Effect Transistor amplification. Smaller and more efficient than conventional power supplies, a MOS-FET amplification circuit delivers power with less distortion and zero On/Off switching noise. This means you can crank up the volume or set it to easy listening. Either way, your sound will be crystal clear.

More information about marine subwoofers

Made For Lasting Performance

Clarion marine speakers are designed to deliver high quality sound, and keep on delivering it in punishing environments. That is why these speakers and subwoofers are equipped with rubber surrounds for superior sonic response, created using Sanoprene rubber material for superior water, salt and UV resistance. Highly durable baskets, grilles that provide excellent weather resistance, as well as great looks, corrosion-resistant gold-plated terminals... and the list goes on. On the seas, Clarion is your assurance of performance and reliability.

HIGH PERFORMANCE MARINE SPEAKERS/SUBWOOFERS

Because Clarion knows what high quality sound is about, it was obvious that not only audio systems or speakers were to be offered for the marine audio line-up, but also subwoofers. The sea is a very demanding environment. So is Clarion, demanding in sound quality, obeying its passion for sound.
