3

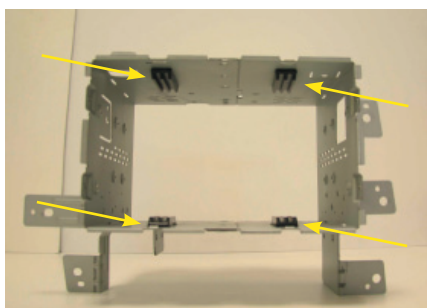

4

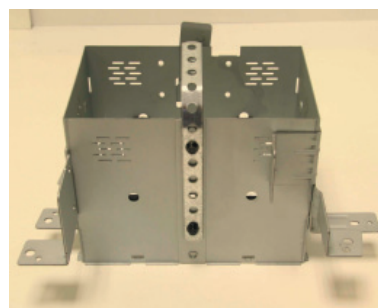

Remove the original plastic bracket from the metal bracket. This is tightened by four screws. The inner plastic panel must be gently removed. This is marked with white stripes.

5

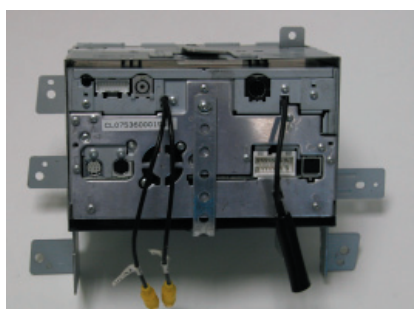

Place the plastic spacers in the metal bracket. This must be placed **2 centimeters** measured from the edges.

6

Mount the metal band beneath the original bracket.

7

Tighten the headunit onto the metal band. There are various positions of the metal band possible. Choose the positions which gives the best result.

6

Place the metal bracket which includes the headunit. Place the dashboard panel. Place the radio trim.

**Connect all of the needed wiring harnesses and check the connections carefully.**
