

# Clarion Car Multimedia & Audio

## Be Heard, Be Seen

Sound waves stimulate the molecules of air, dancing against your eardrums, permeating your entire body. Visuals become shimmering photons, flashing images onto your retina, telling stories that move the soul. The car multimedia environment is where you, as well as all those confined to the space of your car interior, can experience a totally new world of audio-visual entertainment — and expand your senses beyond physical dimensions. Clarion's new line of car multimedia units and systems bring to you this futuristic environment. Capable of exciting your senses unlike anything you've heard or seen before. The car multimedia of tomorrow unfolds now before your very eyes, driven by Clarion's innovative insight, born of Clarion's cutting-edge technology.

be heard  
be seen

Clarion puts your car  
at the forefront of information technology.

Clarion is developing next-generation car-based communication terminals able to access an array of IT services. True to its role as a leader in the automotive IT field, Clarion is ranging far beyond car navigation systems to pioneer new product categories such as Car Digital Assistants.
