

Fingertip connectivity between you and your vehicle.

Remote Keyless Entry:

A simple press of a button can lock or unlock your doors. And with the added convenience of ignition controlled door locks for the safety of you and your occupants.

Remote Engine Start:

Extreme temperatures, whether hot or cold, can make being in your vehicle a dreaded experience. By remote starting the vehicle, the vehicle's interior can be warmed or chilled prior to entry.

Remote Convenience:

It is no longer necessary to be a human contortionist to open the trunk/hatch while your hands full. With a remote trunk/hatch release you'll be able to streamline your lifestyle.

Garage Door Interface (GDI):

Centralize your garage and gate remote controls with Ungo GDI. Single remote control operation of vehicle and garage door functionality.

Multiple Vehicle Operation:

Put an end to keychain clutter with a single remote transmitter.

WARRANTY

Ungo ProSecurity systems are warranted against defects in material and workmanship. The main unit is covered by a Limited Lifetime Warranty. This Limited Lifetime Warranty applies to Ungo ProSecurity systems that have been installed by an authorized Ungo ProSecurity dealer. This warranty is to the Original Purchaser and to the original vehicle in which it was installed into. All other components are covered by a One-year from date of purchase warranty. The warranty is not transferrable to any subsequent owner(s) of the product(s).

NOTE

Due to continuous product improvements, features are subject to change without notice. *Some features and functions may require additional parts and labor.*

Advanced Remote Convenience, Security, and Start Systems

Ungo ProSecurity
A CLARION COMPANY

Simplify your life with a press of a button.

With over 30 years of experience in the mobile security and convenience industry, Ungo ProSecurity thrives on providing products to meet the needs of today's busy lifestyle. It is this dedication and determination that Ungo ProSecurity is able to provide high quality remote keyless entry, remote start, security, and remote start/security combination systems. All of which are feature packed to provide you fingertip operation. Fumbling around for keys will become a thing of the past.

**The premier
2-way
security
and remote
start
system!**

SR9000

**SR9000 (2-Way One Mile Range
Security with Remote Start System)**

- (1) 2-Way LCD Remote Transmitter
- Anti-Code Grabbing Technology
- 4 Auxiliary Outputs
- Compact Satellite Relays for Remote Start
- Gasoline or Diesel Vehicle Compatibility
- Short Run / Turbo Timer Mode
- Tachometer or Voltage Sensing
- Dual Stage Impact Sensor
- Dedicated Horn Honk Output
- Ignition Controlled Door Locks
- Driver's Door Unlock Priority Capable
- Dome Light Supervision Output

The SR9000 puts you in control of your vehicle from up to a mile away by utilizing Secure Digital Communication (SDC).

SDC transmits signals over a wide range of digital frequencies and then recollects them at the receiver. These signals resist jamming and interception, thus providing long range communication between the remote transmitter and the vehicle.

And packed with the latest security and remote start features, convenience and comfort are right at your fingertips.

2-Way security and remote convenience systems not only provide long range operation, but piece of mind as well. Having the ability to remote start or check the status of your vehicle from several hundred feet away is priceless.

Ungo ProSecurity understands this and has created a series of 2-way systems to meet your needs.

**SR6000
(2-Way Security
with Remote Start
Combo System)**

- (1) 2-Way LCD Remote Transmitter
 - (1) 4-Button Remote Transmitter
 - Anti-Code Grabbing Technology
